

AGITO

DOLLY – MODULAR SYSTEM

AGITO

The AGITO has been developed as the only fully modular dolly system capable of working both on track and free roaming. Combining AGITO Sports with the Tower or V-Con Pro and a remote head of your choice enables complete freedom of movement.

Perfect for use in the studio or on location, AGITO Sports offers a new way of moving a camera. With complete flexibility using our growing arsenal of modules and accessories. Easy operation not available with any other system!

FEATURES AGITO SPORTS

- 3 steering modes, '2 wheel', '4 wheel' and Crab movement
- Four-wheel drive with independent adjustable suspension for all-terrain use
- Encoded motor system for highly accurate movement
- Lightweight (weighs 9kg) and small size.
- Turning circle of 2.4m.
- Mounting for two separate cameras with a combination of Tower and Mitchell Plate.
- Max speed of 51 km/h.

FEATURES AGITO TRAX

- Will adjust to any existing track gauge between 300mm to 409mm.
- For use on straight or curved track, minimum curve radius 2m.
- Unique encoded traction control system for absolute positioning on the track.
- Mounting for two separate cameras with a combination of Tower and Mitchell Plate.
- Max speed of 11 km/h until 5 mm/s.
