

VIRTUAL CRANE SYSTEM

VIRTUS

Virtus is a crane with an extension of 5 m, designed for work on virtual set. It is equipped with high technology tracks and complete with remote head. Our technology, Virtus 10 HD, can calculate until 10 axes and it is compatible with all main protocols.

Virtus can be mounted with Virtual Head, a virtual remote head with 2 axes, complete with Iris, focus and zoom engine for any optics. A smaller and lighter crane is available that can also be equipped with a virtual kit, Junior Crane
