

SKATER DOLLY – P+S TECHNIK

## SAKTER MINI

The idea behind the Skater Mini is fairly simple. It basically takes advantage of a friction tilt head on which tracking Wheels are directly attached optimized for an extremely low camera position.

Because the Skater Mini is so small and lightweight it allows you to move the camera by yourself, giving you direct control over tracking shots in any direction, as well as all sorts of curved moves. You can precisely define any centre of rotation at any diameter.

### DATASHEET

---

Payload Max	30 kg
-------------	-------

---

Weight w plate +/-20°	3,8 kg
-----------------------	--------

---

Dimension [ HxWxL ]	72 x 436 x 380 mm
---------------------	-------------------

---

Height w plate +/-20°	51,4 mm
-----------------------	---------

---

Height w plate +/-30°	71 mm
-----------------------	-------
